Mark Albertus  
Principal

April 29, 2010

To Whom It May Concern:

Bill Richardson was the guest speaker for our school-wide assembly on April 20, 2010. His program "It Won't Happen To Me" conveys the message that the number one fatality for teens today is car crashes. His presentation was very powerful and enlightening, as he talked of reasons teens have serious car crashes and how they might have been prevented.

Students and faculty members have commented on the value of the experience of having such a quality speaker with the poignant message that will hopefully make everyone think of their daily decisions regarding driving or riding in the car with someone else.

In addition to the student program, Mr. Richardson provided a student and parent evening presentation for our school. Many students insisted that the parents attend, so they could also hear the important message and learn to be safer drivers and passengers.

We have had many speakers in the past to address our school on various topics, but feel Mr. Richardson's presentation made a huge impact on our students, parents and faculty.

Sincerely,

Mark Albertus  
Principal
